Durable Beverage Labels That Perform from Thomco

When it comes to bottled water, your labels must do more than look good. They need to stick to curved, often wet or cold surfaces without peeling, bubbling, or smearing. At Thomco, we engineer label solutions that meet the demands of beverage packaging, whether you're labeling single-serve bottles, multipacks, or promotional runs.

ENGINEERED FOR DEMANDING CONDITIONS:

- **MOISTURE RESISTANCE** – Withstands condensation and handling without lifting or distortion
- **STRONG ADHESION** – Bonds to PET, HDPE, and other plastics, even in cold-fill environments
- **CURVED SURFACE CONFORMABILITY** – Flexible films that stay put on round containers
- **COLD & WET APPLICATION** – Adhesives designed for chilled or wet-surface labeling
- **SCUFF & SCRATCH RESISTANCE** – Durable finishes that maintain print quality in transport and use

SMART MATERIAL OPTIONS:

- White, clear, or metallic film face stocks
- Gloss, matte, or soft-touch finishes
- Laminated or varnished options for enhanced durability

FLEXIBLE PRINT CAPABILITIES:

- Digital Printing – Ideal for small runs, promotional campaigns, and multiple SKUs. Variable data options are available.
- Flexographic Printing – Cost-effective for high-volume production with color consistency

SERVICES THAT SUPPORT YOU:

- Engineering guidance and adhesive selection
- Prototypes and test runs available
- Just-in-time delivery and stock management options

TALK TO THOMCO

Whether you're creating a premium bottled water label or looking for better label performance in wet environments, Thomco delivers. Our team brings deep experience in adhesives, materials, and print processes—so your labels go on easily, stay on securely, and represent your brand with confidence.

Thomco can source materials that meet FDA regulations for indirect food contact.
